**The Impact of Technology on Sport II** Sep 11 2021 Sport technology has to be seen from the holistic, as well as inter- and transdisciplinary point of view. Product development requires close collaboration between engineers, athletes, sports scientists, and business managers. It requires an in-depth understanding of engineering disciplines, life and sport sciences, as well as economics. The Impact of Technology on Sport II has in its core precisely this philosophy and approach. It aims to provide a deeper insight into the current status of sports technology and to present recent developments in this area from the perspective of different disciplines, industrial practice, academia and athletes. This book brings together work from researchers around the world and, in particular from the Asia-Pacific region. Most sport technologies are covered, including equipment and

materials in various ball sports (golf, cricket, baseball, soccer, tennis, etc.), water sports, athletics, winter sports, mountaineering, motor sports and martial arts. The different technological areas extend to design; dynamics, vibrations and control; aerodynamics; instrumentation and measurements; modelling, simulation and optimisation; biomechanics and human performance; sports medicine; coaching and sports education.

**Practice and Prestige: an Exploration of Neolithic Warfare, Bell Beaker Archery, and Social Stratification from an Anthropological Perspective** Apr 18 2022 Practice and Prestige: An Exploration of Neolithic Warfare, Bell Beaker Archery, and Social Stratification from an Anthropological Perspective investigates the appearance of the 'archer's package' in select Bell Beaker burials raising questions of daily life, warfare, and social stratification during the Neolithic period. It draws on a recent study by the author that applied an anthropological methodology to assess the bone morphology of these skeletons for signs of specialised archery activity. These analyses revealed results at both a population as well as an individual level. In order to contextualise these osteological findings, the book explores the evidence for warfare and archery throughout the Neolithic period in general and the Bell Beaker period in particular. This perspective considers warfare to be a primary function of archery, thereby associating 'archer' burials with concepts of warfare and the warrior. A second perspective delves into prehistoric concepts of specialisation and social hierarchy in order to situate archers, archery, and warfare within potentially stratified populations. These two perspectives allow for the contextualisation of the anthropological results within a broad archaeological framework in which archers and archery were prominent parts of a complex Bell Beaker society.

*The Archers: Ambridge At War* Jul 29 2020 Celebrating the 70th anniversary of the beloved radio show, Ambridge at War takes readers back to before it all began . . . 'Intriguing, comforting and endearingly familiar' Katie Fforde It's 1940 and war has broken out. It is midnight at the turn of the year, and Walter Gabriel speaks the same line that opened the very first radio episode - 'And a Happy New Year to you all!' For Ambridge, a village in the heart of the English countryside, this year will bring change in ways no one was expecting. From the Pargetters at Lower Loxley to the loving, hard-working Archer family at Brookfield Farm, the war will be hard for all of them. And the New Year brings the arrival of evacuees to Ambridge, shaking things up in the close-knit rural community. As the villagers embrace wartime spirit, the families that listeners have known and loved for generations face an uphill battle to keep their secrets hidden. Especially as someone is intent on revealing those secrets to the whole village . . .

*Warfare in the Ancient Near East to 1600 BC* Feb 16 2022 The only book available that covers this subject, *Warfare in the Ancient Near East* is a groundbreaking and fascinating study of ancient near Eastern military history from the Neolithic era to the middle Bronze Ages. Drawing on an extensive range of textual, artistic and archaeological data, William J. Hamblin synthesizes current knowledge and offers a detailed analysis of the military technology, ideology and practices of Near Eastern warfare. Paying particular attention to the earliest known examples of holy war ideology in Mesopotamia and Egypt, Hamblin focuses on: \* recruitment and training of the infantry \* the logistics and weaponry of warfare \* the shift from stone to metal weapons \* the role played by magic \* narratives of combat and artistic representations of battle \* the origins and development of the chariot as military transportation \* fortifications and siegecraft \* developments in naval warfare. Beautifully illustrated, including maps of the region, this book is essential for experts and non-specialists alike.
